## FOREWORD

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

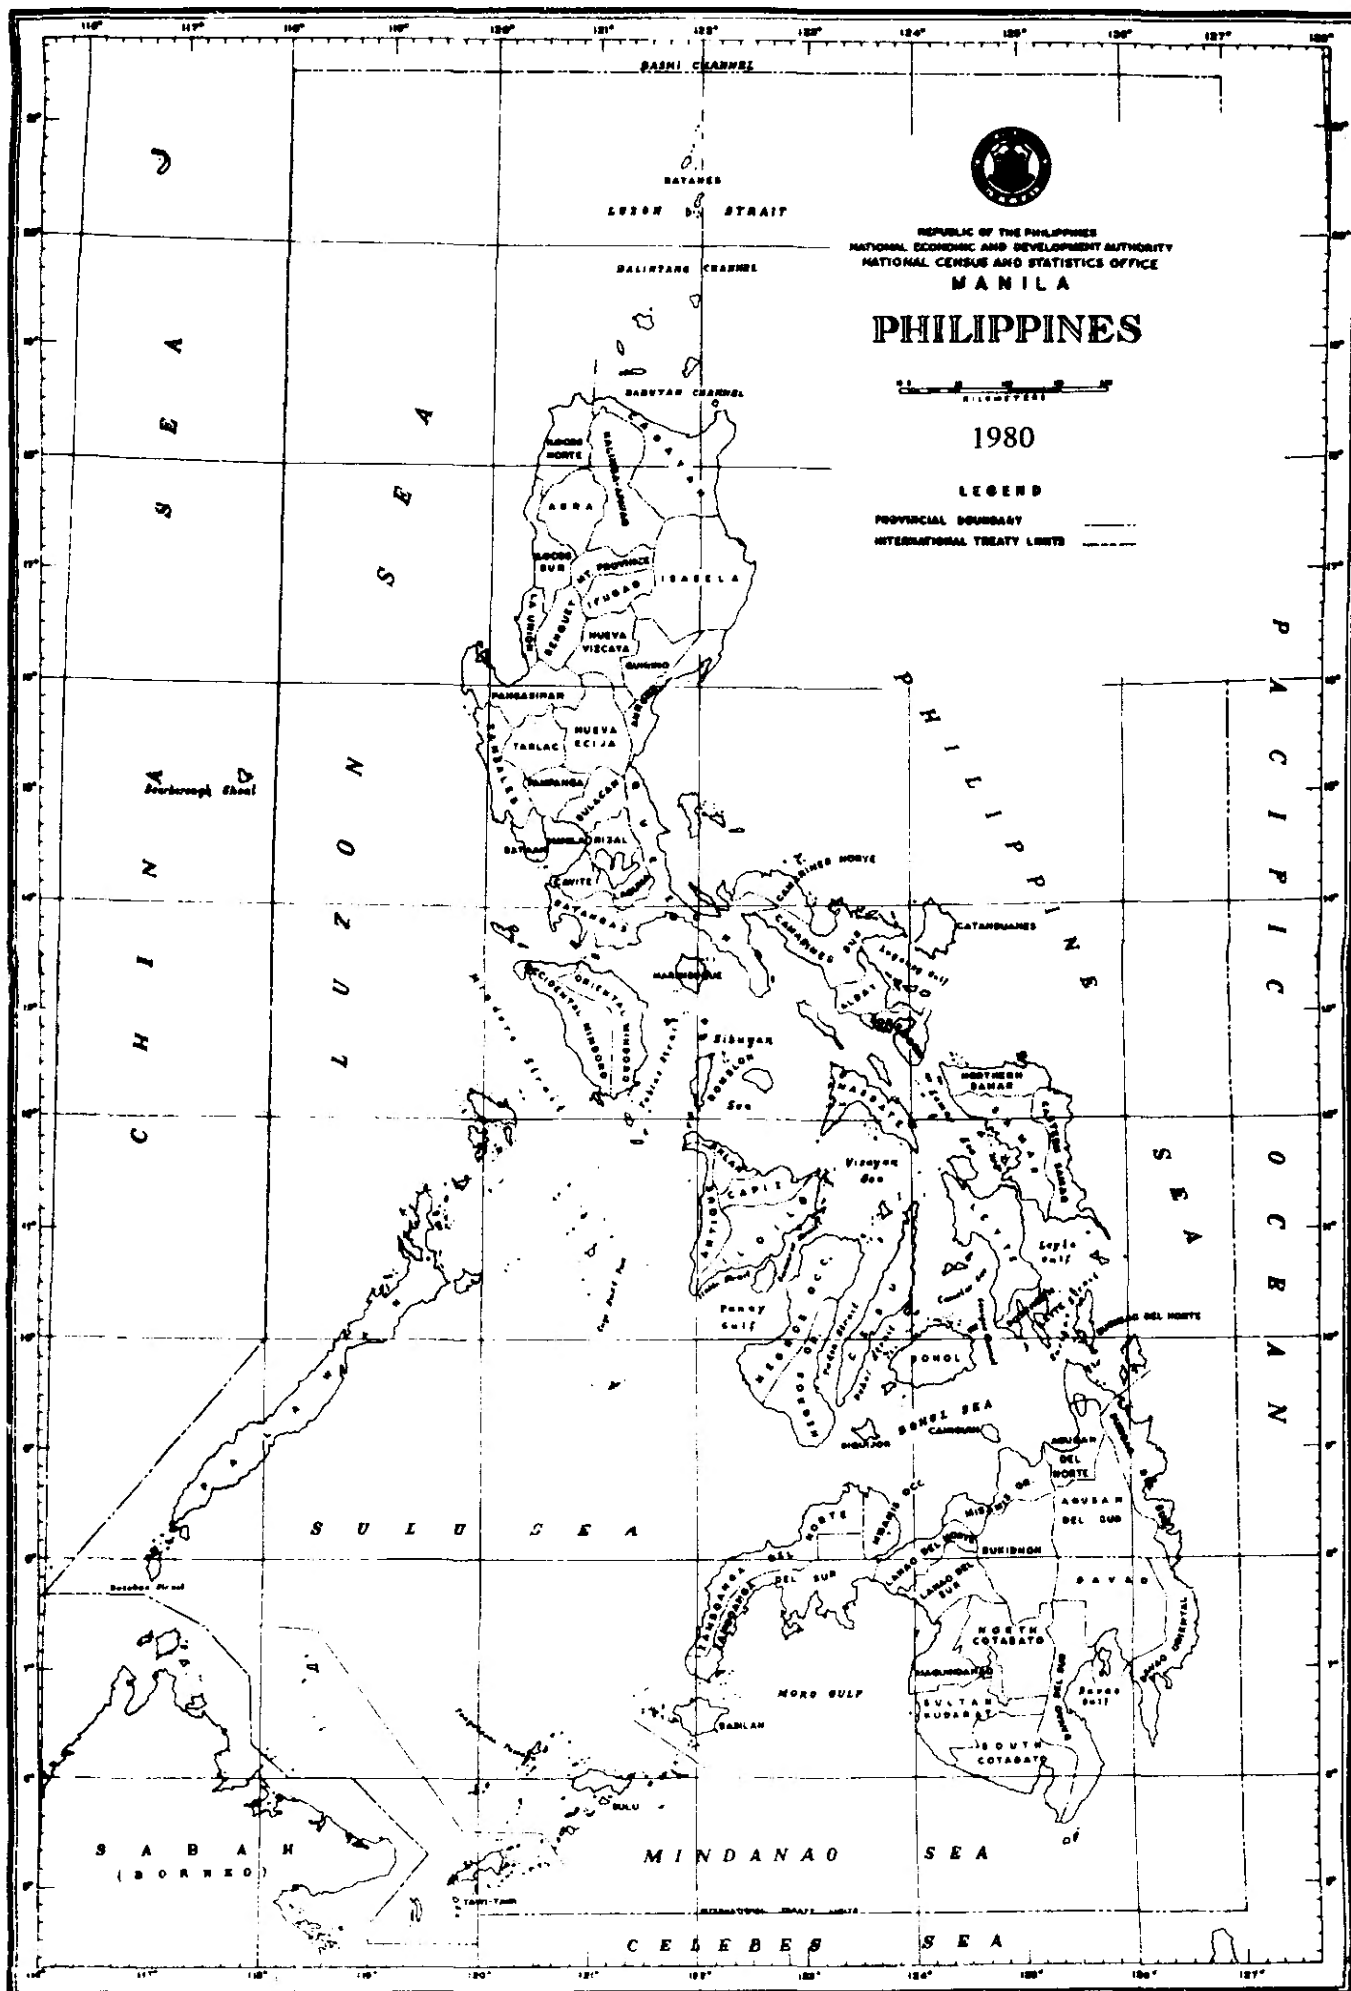

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

  
TITO A. MIJARES

Manila, Philippines

# **Explanatory Text**

## **GENERAL**

### **INTRODUCTION**

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

### **AUTHORITY FOR THE 1980 CENSUS**

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every oensal year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

### **INTER-AGENCY PARTICIPATION**

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

## **EXPLANATORY TEXT**

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

## **CENSUS BOARDS**

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

## **EXPLANATORY TEXT**

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

### **CENSUS ORGANIZATION**

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

### **METHOD OF ENUMERATION AND USE OF SAMPLING**

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

### **PLACE WHERE ENUMERATED**

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

## **EXPLANATORY TEXT**

### **POST ENUMERATION SURVEY**

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

### **CONTENT AND COVERAGE OF THE PUBLICATION**

In this publication, the population and households were described according to the respective items listed below:

<b>Population Items</b>	<b>Housing Items</b>
Age	Type of Building
Sex	Type of Occupancy
Marital Status	Construction Materials of Roof and Outer Walls
Highest Grade Completed	Year Built
Literacy	Floor Area of Dwelling Unit
Language/Dialect Spoken in the Household	Tenure of Owner-Occupant with Respect to the Land
Gainful and Non-Gainful Occupation	Kind of Lighting Facilities
Major and Minor Industry	Use and Source of Water Supply
Migration	Type of Toilet Facilities
	Kind of Cooking Fuel
	Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

### **DEFINITION OF TERMS AND CONCEPTS**

#### **I – POPULATION**

##### **BARANGAY**

A barangay is the smallest political unit in the country and generally its enumeration is

## **EXPLANATORY TEXT**

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

### **ENUMERATION AREA**

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

### **URBAN AND RURAL AREAS**

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
  - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
  - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
  - c. At least three of the following:
    - 1) A town hall, church or chapel with religious services at least once a month;
    - 2) A public plaza, park or cemetery;
    - 3) A market place or building where trading activities are carried on at least once a week;
    - 4) A public building like a school, hospital, puericulture and health center or library.
4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

### **PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD**

The following were counted and enumerated as members of the household:

1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
  - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

## EXPLANATORY TEXT

- or within one year, if abroad;
  - b. students who usually go home to their respective households at least once a week;
  - c. persons working elsewhere who usually go home to their respective households at least once a week;
  - d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions; (2) in mental hospitals; (3) in leprosaria or leper colonies; and (4) in rehabilitation centers for drug addicts;
  - e. trainees in the *Armed Forces of the Philippines*, if their training is not more than six months;
  - f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
  - g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
  4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
  5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
  6. Members of the *Armed Forces of the Philippines* including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
  7. Persons found in the household who have no usual place of residence elsewhere;
  8. Persons found in the household who are not certain of being enumerated elsewhere;
  9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
  10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
  11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
  12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

## EXPLANATORY TEXT

### PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival;
6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a *balikbayan* who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
7. Citizens of foreign countries in refugee camps/vessels; and
8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

### USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

### HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

## **EXPLANATORY TEXT**

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

### **PERSONS NOT LIVING IN HOUSEHOLD**

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

### **RESPONDENT**

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

### **LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD**

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

### **HEAD OF HOUSEHOLD**

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

### **RELATIONSHIP TO HEAD OF HOUSEHOLD**

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

1. Spouse — a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
2. Son/daughter — the head's own child, stepchild, or adopted child.

## EXPLANATORY TEXT

3. Son-in-law/daughter-in-law – refers to a household member related to the head by marriage to his daughter or son.
4. Grandson/granddaughter – child of the son or daughter of the head.
5. Other relative – a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
6. Others – any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

## AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

## MARITAL STATUS

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single – If never been married.
- b. Married – Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed – A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated – If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced – If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown – If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

## CITIZENSHIP

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

## LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

## **EXPLANATORY TEXT**

### **HIGHEST GRADE COMPLETED**

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

### **USUAL OCCUPATION**

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

### **INDUSTRY**

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

### **EVER-MARRIED WOMAN**

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

## **II – HOUSING**

### **BUILDING**

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesorias, condominium) that was vacant;

## EXPLANATORY TEXT

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

The different types of buildings are:

1. **Single house** – a complete structure intended for one household. It includes the so-called “nipa hut” or a small house that is built as a more or less permanent dwelling unit.
2. **Duplex** – a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
3. **Apartment/accesoria/condominium/row house**  
An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.  
An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.  
A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.
4. **Improvised (barong-barong)** – a makeshift or roughly constructed house usually built with salvaged materials.
5. **Commercial/industrial/agricultural** – buildings not intended for human habitation but used as dwelling units at the time of the census.  
Commercial – a building used for transacting business or rendering professional services, such as a storage or an office building.  
Industrial – a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.  
Agricultural – any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.
6. **Other housing unit (natural shelter, boat, etc.)**  
This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.
7. **Hotel, lodging house, dormitory, etc.** – This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
8. **Institutional (hospital/convent/school dormitory/penal institution, etc.)** – a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
9. **Other collective living quarters** – any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

## **EXPLANATORY TEXT**

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

### **DWELLING UNIT**

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

### **CONSTRUCTION MATERIALS OF ROOF**

The kinds of materials used are as follows:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Asbestos
4. Cogon/nipa
5. Makeshift/salvaged materials
6. Others (anahaw, etc.)

### **CONSTRUCTION MATERIALS OF OUTER WALLS**

The kinds of materials may be any of the following:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Wood/plywood
4. Mixed tile/concrete/brick/stone and wood/plywood
5. Asbestos
6. Bamboo/sawali
7. Cogon/nipa
8. Makeshift/salvaged materials
9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

### **YEAR BUILDING WAS BUILT**

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

### **NUMBER OF ROOMS IN THE DWELLING UNIT**

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

## **EXPLANATORY TEXT**

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

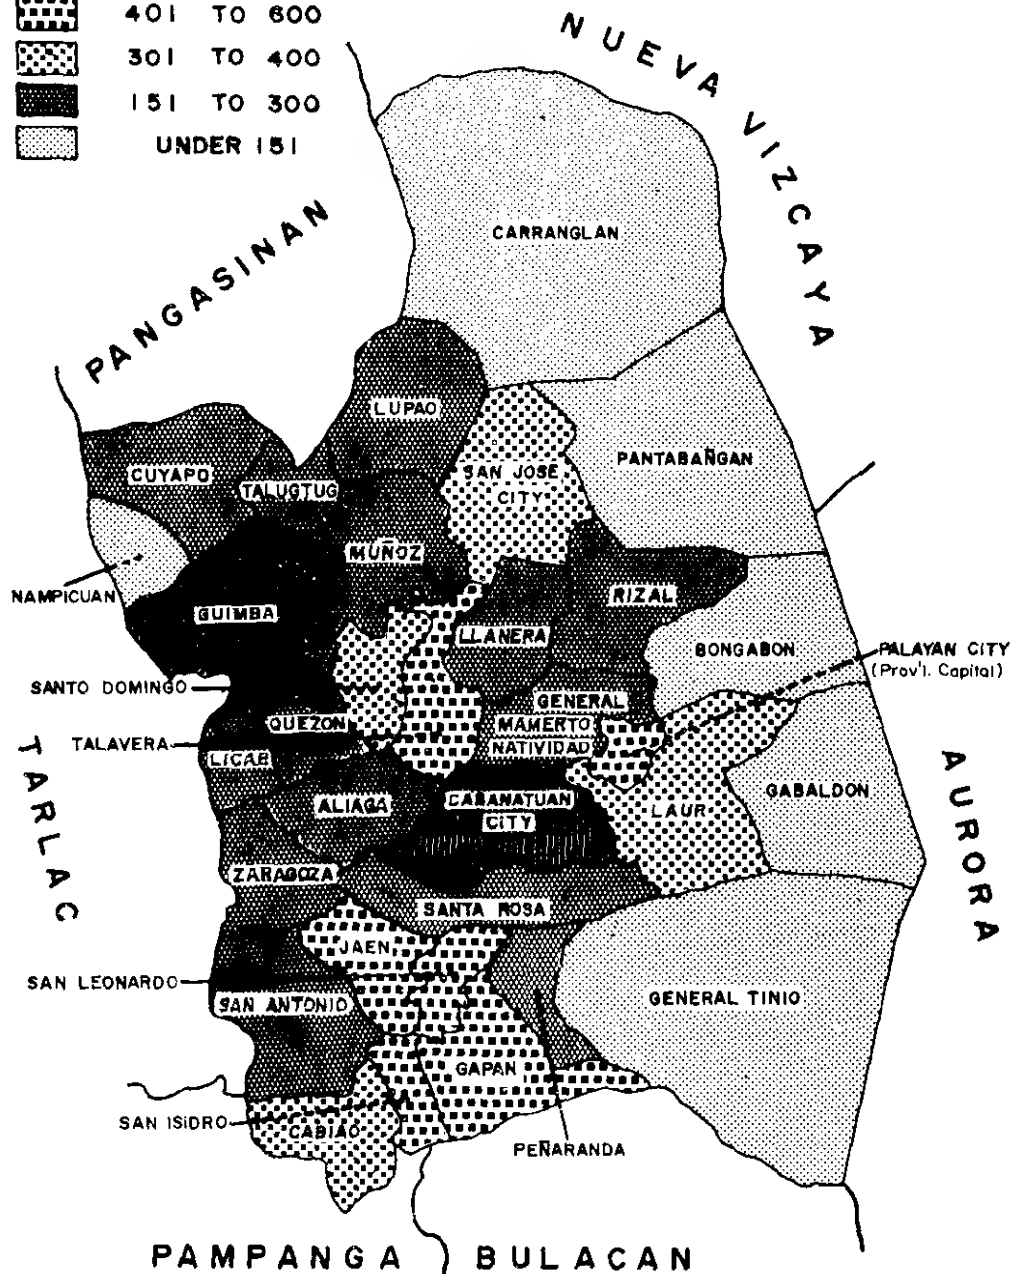

## **FLOOR AREA OF DWELLING UNIT**

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Area of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway was excluded in determining the floor area.

POPULATION DENSITY  
PER SQUARE KILOMETER

POPULATION DENSITY OF  
NUEVA ECIJA PROVINCE,  
BY CITY/MUNICIPALITY: 1980

## **Nueva Ecija: A Brief Analysis**

Nueva Ecija lies northeast of Central Luzon. Its boundaries include Nueva Vizcaya on the northeast, Aurora on the east, Bulacan on the south, Pampanga on the southwest, Tarlac on the west and Pangasinan on the northwest. The Caraballo Mountains separate Nueva Ecija from Nueva Vizcaya on the northeast while a part of the Sierra Madre range lines the eastern border flanked by a narrow strip of Aurora province.

The province has the distinction of being called the "Rice Bowl of the Philippines". Its sprawling ricefields are being served mainly by Pantabangan Dam, an infrastructure complex designed to supply ample water and hydroelectric power in the Central Luzon Region.

The province is composed of 3 cities and 29 municipalities. Although Palayan City is recognized as the capital, the seat of the provincial government is still in Cabanatuan City, the former capital.

### **POPULATION**

The conduct of the 1980 census saw the population of Nueva Ecija hit the one-million mark. Being one of the biggest provinces in the country and the biggest in Central Luzon in terms of area, the province could very well accommodate a population growing at a steady rate. With a population of 1,069,409 and a land area of 5,284.3 square kilometers, only 202.4 persons inhabit each square kilometer despite an increase of 121,414 persons during the intercensal years 1975-1980.

Nueva Ecija, ranking 13th with respect to population, increased annually since 1975 at the rate of 2.44 percent which is 0.27 percentage point behind the country's growth rate. Between 1970 and 1975, the province had a slightly higher rate than that of the national rate (3.34% as compared to 3.01%).

## A BRIEF ANALYSIS

A steady increase in the proportion of urban residents of the province is noted. In 1970, the proportion of urban population was registered at 22.08 percent. This went up to 23.10 percent in 1975 and finally reached its highest mark in 1980 at 25.99 percent. As a consequence, rural dwellers have continuously decelerated in their proportion, from 77.92 percent in 1970 to 76.90 and 74.01 percent in 1975 and 1980, respectively.

In each censal year, the proportion of urban females is slightly higher than their male counterparts, but both demonstrated upward trends.

The table below gives the breakdown of the population of Nueva Ecija according to urban-rural residence and sex for the three censal years in review:

**TABLE A – URBAN-RURAL POPULATION BY SEX,  
NUEVA ECIJA: 1970, 1975 AND 1980**

Area Classification and Sex	1980		1975		1970	
	Number	Percent	Number	Percent	Number	Percent
Total	<u>1,069,409</u>	<u>100.00</u>	<u>947,995</u>	<u>100.00</u>	<u>851,294</u>	<u>100.00</u>
Male	540,749	50.57	481,654	50.81	424,301	49.84
Female	528,660	49.43	466,341	49.19	426,993	50.16
Urban	<u>277,991</u>	<u>25.99</u>	<u>219,002</u>	<u>23.10</u>	<u>188,002</u>	<u>22.08</u>
Male	138,219	12.92	109,423	11.54	91,308	10.72
Female	139,772	13.07	109,579	11.56	96,694	11.36
Rural	<u>791,418</u>	<u>74.01</u>	<u>728,993</u>	<u>76.90</u>	<u>663,292</u>	<u>77.92</u>
Male	402,530	37.65	372,231	39.27	332,993	39.12
Female	388,888	36.36	356,762	37.63	330,299	38.80

Male predominance over females dropped by a unit. This put the provincial sex ratio at 102.29, from 103.28 in 1975. The urban and rural sex ratios likewise incurred very slight decreases of 0.97 and 0.83, respectively. From 99.86 in 1975, the urban areas had 98.89 males for every 100 females in 1980. Meanwhile, the rural areas registered 103.51 males per 100 females when it used to be 104.34 in 1975.

The table showing the population by age group reveals that the number of persons under 5 years of age to the 80 years old and above decreases as the group becomes older, thus resulting in a pyramid-like structure when graphed, with the youngest age group forming the base and those 80 years and above, the apex. Such a behavior is likewise discernible in the rural male and female population. However, a deviation from this structure is noted in the urban male and female population as persons 10-14 years outnumber the age group 5-9 years.

## A BRIEF ANALYSIS

### AGE COMPOSITION

Although the proportion of the younger age group (0-14 years) demonstrated a downward trend, it remains at a relatively high level. In 1970, persons below 15 years old constituted 46.66 percent of the total population. This decreased to 44.73 percent five years after. In 1980, it accounted for 42.43 percent of the total population. The reverse is true for the population of the productive and the older age groups. From 50.31 percent in 1970, the proportion of the productive age group (15-64 years) increased by 1.89 percentage points in 1975 and further increased by 1.66 percentage points during the last census. In 1970, persons 65 years and over comprised 3.03 percent of the total population, 3.07 percent in 1975 and 3.71 percent in 1980.

## A BRIEF ANALYSIS

Below is a comparison of the age composition of the population in three censal years:

**TABLE B — AGE COMPOSITION OF THE POPULATION  
NUEVA ECIJA: 1970, 1975 AND 1980**

Age Composition	1980		1975		1970	
	Number	Percent	Number	Percent	Number	Percent
Total	<u>1,069,409</u>	<u>100.00</u>	<u>947,995</u>	<u>100.00</u>	<u>851,294</u>	<u>100.00</u>
0 — 14 years	453,778	42.43	424,021	44.73	397,201	46.66
15 — 64 years	575,922	53.86	494,885	52.20	428,294	50.31
65 years and over	39,709	3.71	29,089	3.07	25,799	3.03

The median age of the population rose from 17 to 18 years, an indication that there are more elderly people in 1980 than in 1975. This is coupled by a 1.89 increase in its aged-child ratio or the number of adults for every 100 children, from 6.86 in 1975 to 8.75 in 1980.

Dependency ratio (number of dependents for every 100 persons in the productive age group) declined as a result of the increase in the percentage of persons in the productive age and the corresponding decrease in the number of young people. The working populace used to support 98.76 and 91.56 dependents in 1970 and 1975, respectively. However, this dependency load was further reduced to 85.69 dependents in 1980.

The rural workers were more burdened than their urban counterparts as evidenced by a higher dependency ratio for the former (88.01) than the latter (79.37). Nevertheless, both sets of workers were somewhat relieved with the respective decreases in their dependency loads; the rural workers previously supported 94.07 dependents while their urban counterparts had 82.19 dependents.

### MARITAL STATUS

Never married persons reported a decrease in their proportion brought about by the decline in the percentage of never married females. Previously, single persons accounted for about 47.58 and 48.20 percent of the total population 10 years old and over in 1970 and 1975, respectively, but in 1980 only 44.40 percent were unmarried. In contrast, the number of persons falling under other categories registered increases in their respective proportions. Married individuals maintained an upward trend, from 48.06 and 48.17 percent in 1970 and 1975, respectively, to 51.00 percent. The rest (widowed, divorced or separated and those whose status were not stated) followed an up-and-down pattern. After experiencing slight decreases during the first half of the decade, they were able to recover by registering increases during the latter half. As of 1980, widowed persons comprised 4.01 percent of the population 10 years old and over; divorced or separated, 0.52 percent and those who did not disclose their status, 0.07 percent.

Except for the married females whose proportion had continuously displayed an upward trend in the past ten years (from 48.38% in 1970 to 49.02% in 1975 and 51.73% in 1980), the respective percentages of males and females 10 years old and over in the three

## A BRIEF ANALYSIS

categories fluctuated in the three censal years. Among the males, the proportion of never married persons increased from 49.96 percent in 1970 to 50.76 percent in 1975, then declined to 47.35 percent in 1980, while for the females it was 45.26 percent in 1970, 45.60 percent in 1975 and 41.41 percent in 1980. The number of married women (194,106 or 51.73%) was more than the number of married men (190,774 or 50.29%). Similarly, the number of women reported as divorced or separated (2,827 or 0.75%) exceeded that of men (1,104 or 0.29%). Widowed women accounted for 6.02 percent of the females 10 years old and over, almost three times the proportion for males (2.01%). There were only 0.09 percent of the women and 0.06 percent of the men who kept silent about their status.

Shown in the following table is the distribution of the population 10 years old and over by sex and marital status for three censal years:

**TABLE C – POPULATION 10 YEARS OLD AND OVER  
BY SEX AND MARITAL STATUS, NUEVA ECIJA:  
1970, 1975 AND 1980**

Sex and Marital Status	1980		1975		1970	
	Number	Percent	Number	Percent	Number	Percent

Divorced/separated	2,827	0.75	1,355	0.42	1,686	0.58
Not stated	342	0.09	82	0.02	308	0.11

## A BRIEF ANALYSIS

### HIGHEST GRADE COMPLETED

Nueva Ecija is indeed moving onward as indicated by increased proportions of persons who completed high school and college education, and earned academic degrees. High schoolers reached a proportion of 21.05 percent, an increase of 3.17 percentage points over the 1975 figure; college undergraduates increased by 2.50 percentage points or from 4.44 percent to 6.94 percent while academic degree holders added 0.70 percentage point to the 1975 proportion of 2.98 percent and came up with 3.68 percent for 1980. Meanwhile, the proportion of private household population 7 years old and over who had only elementary education and those who did not complete any grade dropped from 65.49 to 61.95 percent and from 7.79 to 5.96 percent, in that order.

The males beat their partners by registering higher proportions of secondary (23.01% against 19.07%) and college schoolers (7.34% against 6.53%) and lower proportions of persons who only reached the elementary level (60.93% against 62.99%) and of those with no schooling at all (5.29% against 6.64%).

## A BRIEF ANALYSIS

The females, on the other hand, persevered more to attain a higher level of education than the males. Thus, the former had more academic degree holders (4.34%) to their credit than the latter (3.03%).

Males and females had approximately equal proportions as far as the number of persons who did not state their educational attainment is concerned – 0.40 and 0.43 percent, respectively.

Only 37.65 percent of the 521,100 persons who had elementary education made it through the sixth grade or higher and the rest reached anywhere from the first to fifth grade. Among those who attained the secondary level, only 39.54 percent went through the fourth year and the remaining percentage ended up either as freshmen, sophomores or juniors. For those who reached the collegiate level, only 22.56 percent completed fourth year or higher while 77.44 percent finished only the lower years.

## A BRIEF ANALYSIS

The distribution of the private household population 7 years old and over according to highest grade completed in the last two censal years is shown in the following table:

**TABLE D – PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER  
BY HIGHEST GRADE COMPLETED, NUEVA ECIJA:  
1975 AND 1980**

Highest Grade Completed	1980		1975	
	Number	Percent	Number	Percent
Total	<u>841,158</u>	<u>100.00</u>	<u>739,648</u>	<u>100.00</u>
No grade completed	50,162	5.96	57,650	7.79
Elementary	521,100	61.95	484,426	65.49
High school	177,095	21.05	132,243	17.88
College	58,336	6.94	32,826	4.44
Academic degree holder	30,946	3.68	21,999	2.98
Not stated	3,519	0.42	10,504	1.42

## A BRIEF ANALYSIS

### LITERACY

The literacy rate for the private household population aged 10 years and over for the province was registered at 87.49 percent, an increase of 0.76 percentage point within a ten-year period, with the males and females getting almost equal shares of the proportion, 50.72 percent and 49.28 percent, respectively, of the total literates. However, the literacy rate for the male population was slightly higher than the females', 88.45 percent for the former and 86.52 percent for the latter.

The accessibility of more schools in urban areas afforded residents to have a higher proportion of literates than their rural counterparts — 91.56 percent against 86.00 percent. Males had more literates to their credit than their partners. This was true in both areas, urban (92.56% against 90.61%) and rural (87.00% compared to 84.97%).

### LANGUAGE OR DIALECT

The Nueva Ecijanans express themselves in more ways than one. There are at least 22 different languages and dialects generally spoken in the 186,487 private households of the province. Tagalog is listed as the most widely spoken dialect with 73.54 percent of the total private households using it as a medium of communication. Ilocano at 25.29 percent and Pampango (Kapampangan) at 0.60 percent come second and third, respectively.

Tagalog is most popular among the private households of 20 municipalities and 2 cities, Cabanatuan and Palayan. Meanwhile, Ilocano is the major dialect in San Jose City and in the rest of the municipalities.

### GAINFUL OCCUPATION

Only 46.04 percent of the 613,284 private household population 15 years old and over are gainfully employed. The rest (53.96%) are reported in non-gainful occupation such as volunteers (0.01%), housekeepers (33.76%), students (13.69%), pensioners and other retired persons (1.26%), disabled persons (0.75%) and those who did not report any activity (4.49%).

Among the gainfully employed individuals, agricultural, animal husbandry and forestry workers, fishermen and hunters register the highest proportion (61.11%). Next to them are production and related workers, transport equipment operators and laborers (17.06%). The rest are distributed as follows: sales workers, 6.50 percent; professional, technical and related workers, 6.39 percent; service workers, 4.83 percent; clerical and related workers, 2.94 percent; workers not classifiable by occupation, 0.90 percent and administrative, executive and managerial workers, 0.27 percent.

A steady increase in proportion was registered by workers from the agricultural, animal husbandry and forestry group. In 1970, 55.81 percent of the population 15 years old and over belonged to this group. Five years after, the proportion increased to 58.40 percent. This further increased by 2.71 percentage points in 1980 to come up with the present proportion of 61.11 percent. Meanwhile, steady decreases are noted among the administrative, executive and managerial workers (from 1.16% in 1970 to 0.68% in 1975 and 0.27% for 1980), service workers (respective decreases of 0.59 and 0.23 percentage point for the first half and latter part of the decade), and production and related workers, transport equipment operators and laborers (a 1.68 percentage-point decrease between 1970-1975 and by 1.67 percentage points for the next five-year period). The rest either went up or down with their proportions. These are the professional, technical and related workers (6.11% in 1970, down to 5.07% in 1975 and up again to 6.39% in 1980), clerical and related workers (from

### A BRIEF ANALYSIS

1.70% in 1970 to 3.06% in 1975, then declining by 0.12 percentage point), and sales workers (from 7.03% in 1970 to 7.36% and 6.50% for 1975 and 1980, respectively).

Males and females differ in the kind of occupation engaged in. Most of the men (69.69%) are agricultural, animal husbandry and forestry workers, fishermen and hunters while many of the women (23.86%) are professional, technical and related workers. But both sexes turned out a handful of administrative, executive and managerial workers, 0.27 percent for the males and 0.30 percent for the opposite sex.

Urban and rural dwellers alike turned out higher percentages of agricultural, animal husbandry and forestry workers, fishermen and hunters relative to the other occupation groups, but the former has a lower proportion (31.61%) than the latter (71.63%).

FIG. 5 – GAINFUL WORKERS 15 YEARS OLD AND OVER  
BY MAJOR OCCUPATION GROUP. NUEVA ECIIJA: 1980

## A BRIEF ANALYSIS

The table below reflects comparative changes in the percentage of workers engaged in various gainful occupations from 1970 to 1980:

**TABLE E — GAINFUL WORKERS 15 YEARS OLD AND OVER  
BY MAJOR OCCUPATION GROUP, NUEVA ECUIJA:  
1970, 1975 AND 1980**

Major Occupation Group	1980		1975		1970	
	Number	Percent	Number	Percent	Number	Percent
Total	<u>282,380</u>	<u>100.00</u>	<u>249,712</u>	<u>100.00</u>	<u>244,951</u>	<u>100.00</u>
Professional, technical and related workers	18,046	6.39	12,655	5.07	14,960	6.11
Administrative, executive and managerial workers	765	0.27	1,697	0.68	2,837	1.16
Clerical and related workers	8,306	2.94	7,655	3.06	4,168	1.70
Sales workers	18,348	6.50	18,393	7.36	17,206	7.03
Service workers	13,632	4.83	12,628	5.06	13,846	5.65
Agricultural, animal hus- bandry and forestry workers, fishermen and hunters	172,568	61.11	145,821	58.40	136,715	55.81
Production and related workers, transport equipment operators and laborers	48,164	17.06	46,763	18.73	49,996	20.41
Workers not classifiable by occupation	2,551	0.90	4,100	1.64	5,223	2.13

## INDUSTRY

More than half (62.26%) of the gainful workers 15 years old and over benefit from agriculture, fishery and forestry, with a large majority (94.76%) engaged in agricultural crop production. Community, social and personal services employ only 12.33 percent. Two leading sources of jobs in this industry group are education services (33.14%) and personal and household services (30.42%). The rest of the gainful workers are into wholesale and retail trade, 6.29 percent (92.20% in the wholesale trade and 7.80% in the retail trade); transportation, storage and communication, 5.76 percent; construction, 4.03 percent; manufacturing, 3.53 percent; financing, insurance, real estate and business services, 1.91 percent; electricity, gas and water, 0.40 percent and mining and quarrying, 0.05 percent. A few (3.44%) of the gainful workers are reported in activities not adequately defined.

## A BRIEF ANALYSIS

## MIGRATION

Most of the Nueva Ecijanos (96.59%) were residing in the same city/municipality on May 1, 1975 and during the 1980 census; 1.69 percent moved out to another city/municipality of the same province; 1.49 percent were in another province, while 0.23 percent were in other countries on May 1, 1975.

The proportion of males (96.83%) who stayed put in their place of residence on May 1, 1975 and 1980 was slightly higher than the females (96.35%). Thus, the proportion of females moving in and out either from one city/municipality to another within the province or from one province to another was higher. Female intra-provincial migrants and inter-provincial migrants were noted at 1.82 and 1.61 percent, respectively, while the corresponding figures for the opposite sex were 1.56 and 1.38 percent.

## A BRIEF ANALYSIS

### TYPE OF BUILDING

Single house is the most common type of building with 95.62 percent of the households occupying such type. The remaining percentage is distributed as follows: improvised structures such as barong-barong, 2.52 percent; duplex, 0.89 percent; apartment/accesoria/condominium/row house/etc., 0.47 percent; commercial/industrial/agricultural buildings, 0.39 percent; hotel lodging house, dormitory, etc., 0.06 percent and other types of buildings (institutional, other housing unit and other living quarters), 0.05 percent.

A greater percentage (74.71%) of single house occupants are found in the rural areas. The same holds for duplex (64.27%), improvised structures or barong-barong (78.19%), other housing units (83.33%) and hotel/lodging house/dormitory (77.27%) occupants. On the other hand, apartments/accesorias/condominiums/row houses (85.53%), commercial/industrial/agricultural buildings (81.56%), institutional buildings (55.88%) and other collective living quarters (75.00%) are a common sight in the urban areas.

The housing conditions of households in Nueva Ecija are briefly summarized in the following table:

**TABLE F — NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS  
BY TYPE OF BUILDING, NUEVA ECIJA: 1970 AND 1980**

Type of Building	1980		1970	
	Number	Percent	Number	Percent
Total	<u>186,487</u>	<u>100.00</u>	<u>139,498</u>	<u>100.00</u>
Single house	178,326	95.62	135,476	97.12
Duplex	1,668	0.89	973	0.70
Apartment/accesoria/condominium/ row house/etc.	871	0.47	580	0.42
Improvised (barong-barong)	4,696	2.52	1,566	1.12
Commercial/industrial/agricultural	732	0.39	886	0.63
Other housing unit: natural shelter, boat, etc.	30	0.02	—	—
Hotel, lodging house, dormitory, etc.	110	0.06	—	—
Institutional (hospital, convent, school dormitory, etc.)	34	0.02	17	0.01
Other collective living quarters (military camp, etc.)	20	0.01	—	—

## **A BRIEF ANALYSIS**

### **TYPE OF OCCUPANCY**

Occupied dwelling units of the province are owned by most of the resident households (91.82%) themselves. Other households lease (3.78%) or sublease (0.30%) their dwelling units while 4.10 percent are rent-free occupants.

Rural dwellers have a higher percentage of ownership of occupied dwelling units than the urban ones, 93.61 percent as against 86.66 percent.

Most of the dwelling unit owners are single house dwellers, 96.49 percent (Table 1).

### **CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS**

Nearly two-thirds (61.26%) of the households in Nueva Ecija use strong materials for roofing such as galvanized iron/aluminum (60.63%), tile/concrete/brick/stone (0.46%) and asbestos (0.17%) while the remaining percentage (38.74%) settle for light materials such as cogon/nipa (37.94%), makeshift/salvaged materials (0.50%) and other materials like anahaw, etc. (0.30%).

More than three-fourths of the urban households (79.63%) have their houses roofed with strong materials, 78.97 percent of which are galvanized iron/aluminum. Those who make use of light materials account for 20.37 percent of the total number of households. Likewise, majority of the rural households prefer strong materials (54.88%), although their proportion is lower than their urban counterparts.

As regards construction materials of outer walls, 61.21 percent of the households use strong materials, the most popular of which is wood/plywood (27.52%). Among the light materials, bamboo/sawali is the most popular with 23.78 percent of the households constructing their outer walls with such materials (Table 2).

### **YEAR BUILT**

Dwelling units of 77,537 households or 41.58 percent are built between 1976-1980. Others occupy houses constructed during 1971-1975, 22.61 percent; 1961-1970, 21.20 percent; 1951-1960, 9.34 percent; and 1942-1950, 3.24 percent. Only 2.03 percent dwell in structures built in 1941 or earlier (Table 2).

### **FLOOR AREA OF DWELLING UNIT**

Most of the households, (51.45%) have their structures with floor area of less than 30 square meters while others dwell in units 30-49 square meters (31.10%), 50-69 square meters (8.65%), 70-99 square meters (4.74%), 100-149 square meters (2.24%), 150-199 square meters (0.82%), 200-249 square meters (0.38%) and 250-299 square meters (0.29%). Very few households (0.33%) could very well afford to live comfortably in spaces measuring up to 300 square meters and over (Table 3).

### **TENURE OF OWNER OCCUPANT WITH RESPECT TO THE LAND**

Dwelling unit owners who also own the land where their structures are erected compose 46.71 percent of the households. Lessees or sublessees comprise 27.72 percent; farm lessees/agricultural tenants of landowners, 7.69 percent and those with other legal tenure, 4.84 percent. However, 13.04 percent of the households have no tenure (squatter, etc.) at all (Table 4).

## **A BRIEF ANALYSIS**

### **SOURCE AND USE OF WATER SUPPLY**

Tubed/piped shallow well is the most common source of water supply of many households whether for drinking (51.37%), for kitchen use (55.23%) or for washing clothes (53.33%). More than three out of ten households utilize water from tubed/piped shallow well for drinking (34.25%), for kitchen use (31.73%) and for washing clothes (30.76%). Only a small portion of the population has access to faucet, community water system for their supply for drinking (11.53%), for kitchen use (10.03%) and for washing clothes (9.66%). Users of water from dug well in the above order of use constitute 0.94 percent, 1.05 percent and 0.80 percent, while some households depend on spring – for drinking and kitchen use, 1.54 percent each and for washing clothes, 1.19 percent. Some households obtain water for drinking (0.37%), for kitchen use (0.42%) and for washing clothes (4.26%) from lake, river, stream, irrigation, etc. (Table 6).

### **KIND OF LIGHTING FACILITIES**

Electricity has become accessible to 51.13 percent of the households as a result of the government's all out effort of bringing electricity to every barangay. This leaves a minority to depend on kerosene, 47.31 percent; liquefied petroleum gas (LPG), 1.15 percent; oil, 0.09 percent; and other kinds such as candle or wax, 0.32 percent (Table 5).

### **COOKING FUEL**

A great majority (82.09%) of the households depend on wood or charcoal as cooking fuel while the rest use either liquefied petroleum gas (8.12%), kerosene (6.31%), electricity (1.89%) or other kinds of fuel (1.59%) for cooking. A good number of both urban and rural folks cook with wood or charcoal, 66.11 percent for the former and 87.64 percent for the latter (Table 8).

### **TOILET FACILITIES**

More households (29.02%) have water-sealed with other depository than any other type of toilet facility. Twenty-six percent (26.10%) use water-sealed with sewer/septic tank; 24.67 percent use the closed pit (antipolo, etc.); 9.68 percent, open pit and 1.15 percent, other types such as pail system, etc. Nearly one-tenth or 9.38 percent of the households do not have toilet facilities.

Water-sealed with sewer/septic tank is more popular among urban households (43.14%) while water-sealed with other depository is more common among their rural counterparts (28.97%). It is noted that more rural (10.25%) than urban (6.87%) households lack toilet facilities.

### **OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER**

Ownership of radio comes easy to 72.45 percent of the households and television, to 19.32 percent. Only 10.76 percent of the households own a refrigerator/freezer.

Electricity, being more readily available to urban households than to rural folks, brings about a higher proportion of ownership of household appliances for the former than the latter. More than three-fourths of the urban households (77.44%) have radios; 33.09 percent are with television sets and 22.43 percent have refrigerators/freezers. Meanwhile, 70.72 percent of the rural households own radios; 14.53 percent are with television sets and 6.70 percent have refrigerators/freezers.

## CERTIFICATION

I HEREBY CERTIFY that the data set forth in this form were personally obtained by me in accordance with the rules and regulations promulgated by the National Census and Statistics Office.

Name of person accomplishing this form  
(Printed Name & Sign)  
Title \_\_\_\_\_  
Date \_\_\_\_\_ 1980

PERSONS TO BE ENUMERATED AS MEMBERS OF COLLECTIVE HOUSEHOLDS

1. HOTELS, LODGING HOUSES, DORMITORIES, ETC.

- a. Proprietor, manager and employees living in the establishment, except those living therein with their own families and those who usually go home to their respective families at least once a week.
- b. Permanent lodgers/boarders (those who have stayed or expect to stay for one year or longer) and those temporary lodgers/boarders who have stayed for six months or longer as of May 1, 1980 or have been away from their own families for the same period. However, exclude those who usually go home at least once a week.
- c. Lodgers/boarders who are not residents of the Philippines and who have been in the Philippines for one year or longer as of May 1, 1980, or expect to stay in the Philippines for one year or longer. However, exclude those who have temporary place of residence elsewhere in the Philippines to where they usually go home. Exclude also diplomatic representatives or UN, ILO or USAID officials who, like diplomatic representatives, are subject reassignment to other countries after their tour of duty in the Philippines, and members of their families.

2. HOSPITALS AND NURSES' HOMES

- a. All patients, including those just confined, in mental hospitals, leprosaria or leper colonies, pavilions of tuberculosis sanatoria where patients stay more or less permanently, and rehabilitation centers for drug addicts.
- b. Patients who have been confined for six months or longer as of May 1, 1980 in other kinds of hospitals and in wards for temporary confinement in tuberculosis sanatoria.
- c. Nurses in nurses' homes who do not usually go home at least once a week.
- d. Staff members and employees living in hospitals/nurses' homes, except those living therein with their families and those who usually go home at least once a week.

3. WELFARE INSTITUTIONS (Homes for the Aged and Infirm, Orphanage, Boys' Town, etc.)

- a. All inmates or wards, including those just confined.
- b. Staff members and employees living in the institutions, except those living therein with their families and those who usually go home at least once a week.

4. CORRECTIVE AND PENAL INSTITUTIONS

- a. All prisoners in national prisons and reformatories (welfareville).
- b. Prisoners and detainees in provincial or city/municipal jails who have been continuously confined for six months or longer, including confinement elsewhere, as of May 1, 1980, or those whose sentence is for six months or longer even if the sentence is on appeal.
- c. Staff members and employees living in the institutions except those living therein with their own families and those who usually go home at least once a week.

5. CONVENTS, NUNNERIES, SEMINARIES, AND BOARDING SCHOOLS

- a. Monks, priests, ministers, nuns, seminarians etc. However, priests or ministers of sects other than the Roman Catholic Church who live in the convent or house close to church or chapel with their own families are to be excluded (private households).
- b. Students in boarding schools (schools where students are required to stay in the school campus).
- c. Staff members, employees and helpers living in the premises, except those living therein with their own families and those who usually go home at least once a week.

6. MILITARY CAMPS AND STATIONS (PC, Army, Air Force and Navy): PMA

- a. Officers and enlisted men/draftees, except those who live in the premises with their own families and those who usually sleep most nights with private households or in hotels, lodging places or dormitories. Include those belonging to the unit in the camp or station who are away on military operation or mission or aboard naval vessels, except those whose families are living in the camp or station (their own families will report them).
- b. PMA cadets and trainees whose training is for six months or longer.
- c. Detainees who have been continuously confined for six months or longer, including confinement elsewhere, as of May 1, 1980.
- d. Civilian employees living in the camp or station, except those living therein with their own families and those who usually go home at least once a week.

7. LOGGING, MINING AND CONSTRUCTION/PUBLIC WORKS CAMPS: PLANTATIONS AND AGRICULTURAL/FISHERIES EXPERIMENTAL OR BREEDING STATIONS, ETC.

- a. Proprietor, manager, contractor and employees who do not live with their families in the premises and are supplied lodging (beddings, etc.) and/or meals by the company, firm, contractor or agency, except those who usually go home at least once a week.

8. OCEAN-GOING AND INTERISLAND/COASTAL VESSELS OR DEEP-SEA FISHING VESSELS

- a. Filipino crew members of ocean-going vessels (whose own families live in the Philippines) at port as of 12:01 A.M. May 1, 1980, except those who usually go home to their own families in the Philippines at least once every six months.
- b. Any crew member of interisland/coastal vessel or deep-sea fishing vessel at port on any day during the enumeration, if the crew member has no home other than the vessel.

9. REFUGEE CAMPS

- a. Filipino citizens working and living inside the camps.
